

HOW TO TACKLE A GOBLIN

Whip-tail goblins are sneaky critters, sneak thieves, robbers, and liars. They're pretty small with short stubby legs so if a nasty goblin picks on you, you should be able to **OUTRUN** them, but make sure they ain't carrying a gun. If they do have a six-shot blaster then you need to try something different. Goblins are pretty stupid so you could try **CONFUDDLING** them: maybe show them a couple of mine shovels and ask them to take their pick, or draw a circle round them in the dirt and ask them to stand in the corner - while the goblin's trying to work it out you run like the wind!
