

You Will Need

- * 2 toilet paper tubes
- * paints/crayons or felt tips
- * piece of cardboard from a cereal box (h:2in x w:6in)
- * glue
- * scissors
- * string

What To Do

1: Colour/paint the toilet rolls black.

2: Colour/paint the piece of cardboard black on both sides.

3: Place the cardboard so that it lies before you with the long side horizontal and the short side vertical. Place a line of glue along each of the short sides, one for each toilet roll. Place the toilet rolls onto the lines of glue and hold them there for a few minutes, then leave them to dry.

4: Now to create the strap so you can place the binoculars around your neck. You need a piece of string cut to the length that you would like. Then attach each end of the string to one end of each toilet roll. You can do this using glue, sellotape or get your adult helper to make two small holes in the ends of the toilet rolls and pull the string through and tie a knot.
